- We don't offer or submit anything to our customer until unless we are internally satisfied and whatever we submit to buyer it must be checked by our QA responsible before submission.
- Our final inspection at first time offer pass rate is 98% in 2019. We never compromise with quality and we always try hard to give best possible quality to achieve full confidence of our customers as a potential business partner..

CERTIFICATION

BSCI

Our Factory is Approved and Certified by BSCI. The Business Social Compliance Initiative (BSCI) is a leading supply chain management system that supports companies to drive social compliance and improvements within the factories and farms in their global supply chains.

We achieved Oeko_tex Certificate for our Products Class I. Product class I: Articles for babies and toddlers. Consumers' interests in sustainable articles are increasing and brands in the clothing industry are increasingly more demanding with regard to the purchasing of certified textile products. If you want to be a successful manufacturer, you should actively face the growing demands. Certification according to STANDARD 100 by OEKO-TEX® can ensure a decisive competitive advantage for manufacturers.

OEKO-TEX CLASS I

OEKO-TEX CLASS II

We achieved Oeko-Tex certificate for product class II. Product class II: Articles with direct contact to the skin. Consumers' interests in sustainable articles are increasing and brands in the clothing industry are increasingly more demanding with regard to the purchasing of certified textile products. If you want to be a successful manufacturer, you should actively face the growing demands. Certification according to STANDARD 100 by OEKO-TEX® can ensure a decisive competitive advantage for manufacturers. It is performed uniformly around the world by the independent OEKO-TEX® institutes and is applicable to textile products of all processing steps, from the thread to the end product.

Our factory is approved and certified by ACCORD. The Accord is an independent, legally binding agreement between brands and trade unions to work towards a safe and healthy garment and textile industry in Bangladesh. The Accord covers factories producing Ready-Made Garments (RMG) and at the option of signatory companies, home textiles and fabric & knit accessories.

ACCORD

GOTS & OCS.

Our factory is certified by GOTS & OCS. The Organic Content Standard (OCS) applies to any non-food product containing 5-100% organic material. It verifies the presence and amount of organic material in a final product. It tracks the flow of a raw material from the source to the final product and this process is certified by an accredited third party.

The Global Organic Textile Standard (GOTS) was developed through collaboration by leading standard setters with the aim of defining requirements that are recognised worldwide and that ensure the organic status of textiles from harvesting of the raw materials through environmentally and socially responsible manufacturing all the way to labelling in order to provide credible assurance to the consumer.

Our factory is certified by GRS. The Global Recycle Standard (GRS) was originally developed by Control Union Certifications in 2008 and ownership was passed to the Textile Exchange on 1 January 2011. The GRS is an international, voluntary, full product standard that sets requirements for third-party certification of recycled content, chain of custody, social and environmental practices and chemical restrictions.

GRS

COMPLIANCE

COMPLIANCE, SAFETY PROCEDURE & EMPLOYEES BENEFITS:

Without Social and environmental responsibilities, business is unethical and not legal. That's why we invested a lot to keep the working environment safe and secured. We give emphasis on reasonable access to safe drinking water, sanitary facilities, fire safety, adequate lighting and proper ventilation.
